CLEANER

GREENER

An aerial photograph of a lush green forest. A winding river flows through the lower right portion of the image, reflecting the sky. The trees are dense and vibrant green, with some lighter green areas indicating different tree species or sunlight filtering through the canopy.

Join us on the journey towards
a better world

We create safer, cleaner and greener solutions for healthcare, hygiene and the food industry. A new sustainable standard is our contribution to the future.

CELLCOMB AB
Åmålsvägen 13
661 32 Säffle
Sweden

+46 54 7000 400
info@cellcomb.com

We address needs in areas with tough challenges and high demands. What we do has an impact on people's health, quality of life and well-being. Our goal is to offer the most sustainable solution for the future of our environment and economy.

Our Vision and Values

We are a leading manufacturer of disposable eco friendly laminates. Through our solutions we contribute to the circular economy.

Operating from our production plant in Säffle Sweden and Kronoby, Finland. Our business areas are **Medtech**, **Foodtech**, **Hygiene** and **HomeAway**, serving customers worldwide.

Privately owned by investors, our mission is to create and operate a new industry standard. Our vision is to be the first choice for operators seeking the highest

levels of safety, security and comfort, without compromising on climate, profitability or the working environment.

We give you opportunities to make choices that reduce risks, increase the quality of life and save resources.

Foodtech

ABSORBING FOOD PADS

Focus on food safety and reduced food waste, based on organic materials.

To us it is instrumental and a given, to cover all aspects – from the packaging solutions all the way to the dinner table and further on in a sound eco-system. We never take any shortcuts, nor do we compromise.

Right now, a lot of initiatives focus on safety and sustainability in combination with food which is a key necessity in many ways.

According to the Swedish Food Agency's calculations, a third of all food that is produced never ends up being eaten. Food waste is a big threat to our climate and a big loss of our planet's resources, but together with our clients, we want to fight these numbers. This contributes to maintaining one of the UN's Sustainable Development Goals, namely to half all food waste by the year 2030.

Medtech

MEDICAL SHEETS AND PROTECTION

Innovative solutions from renewable materials for safer medical care.

Requirements in hygiene, safety and efficient approaches within health and elderly care are demanding. Based on our long experience, we are aware of what needs and challenges occur daily. This is why Cellcomb knows what it takes to protect the industry's standards.

Cellcomb Medtech provides solutions for healthcare that ease the workload in a wise, sustainable and secure way. With development and production based in Sweden and Finland, we have full control from blueprint to manufacturing which secures high quality throughout the whole process. In addition to this, our solutions are resource optimized which benefits healthcare from several perspectives.

Another important, ongoing objective is to relieve hospital staff that work closely with patients as this can contribute to shorter care times.

Private label

Do you have a specific product demand or a wish of strengthen your own brand? We at Cellcomb work closely with our customers, offering bespoke products and private label/OEM production. We are in every aspect focused on assisting our customers and will do our outmost to comply with what you as a customer request. We have many years of experience producing private label/OEM products with effective production methods and reliable delivery schedules.

Please contact us to investigate what we can do for you and what we can supply to meet your needs.

Hygiene

DIAPERS AND PANTY LINERS

Sustainable, comfortable and safe laminate for diapers and panty liners.

Solutions intended for personal hygiene and enuresis care such as panty liners, sanitary napkins and diapers, have high demands in comfort and function with clean, organic materials.

At Cellcomb we take it one step further.

The climate, future generations and our health are important aspects of life. Therefore, we are specialized in sustainable solutions. Our laminate is manufactured in Sweden and in many cases produced out of renewable raw materials that are compostable.

Our combination of efficient manufacturing and high capacity of roll goods creates possibilities for customization depending on your needs. This makes us a clear partner in producing hygiene and enuresis products.

HomeAway

A SUSTAINABLE ALTERNATIVE TO TEXTILES

Offer your guests quality and comfort as well as a sustainable alternative to textiles.

Regardless of when, where and how, a good night's sleep in comfortable, soft materials is always desirable. Based on our experience, this can be a challenge for short-term accommodations with a lot of visitors as bed sets are changed frequently. In addition to this, washing and storage possibilities can also be more limited. Our solutions entail crisp, soft sheets and towels ensuring comfort as well as contributing to a better climate.

Cellcomb Homeaway consists of sustainable solutions for short-term use, convenient in many different areas of use. The range was developed as a sustainable alternative to textiles. They are the perfect option if you want to sleep comfortably, save time and the environment. At the same time, reducing the workload for employees in the hospitality industry is addressed as they only weigh 1/5th as much as conventional cotton alternatives, are compact, flexible and do not require any washing.

Foodtech

Absorbing food pads

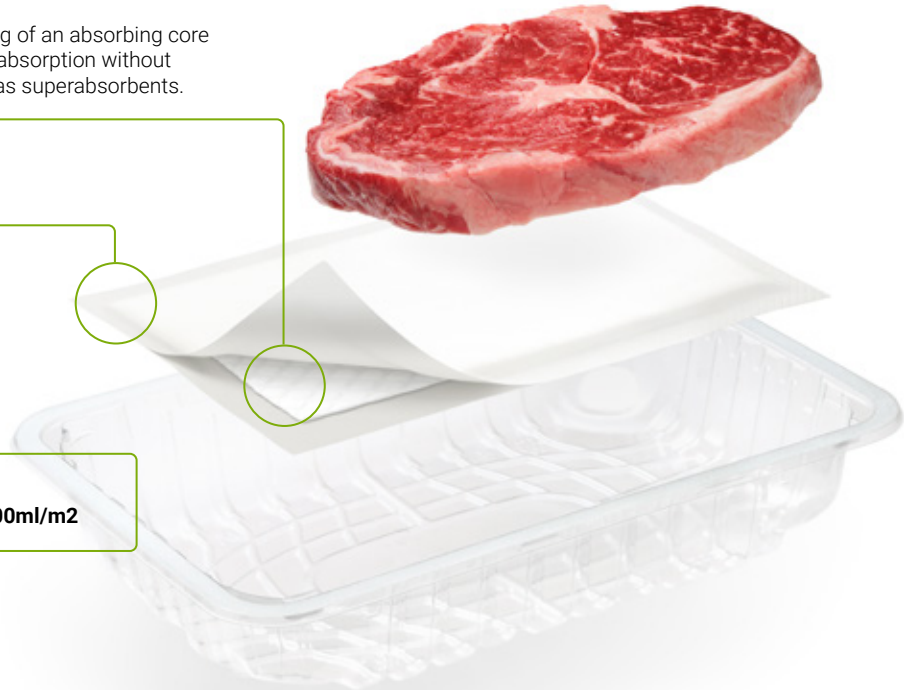

Focus on food safety and reduced food waste, based on organic materials

With our innovative technology consisting of an absorbing core completely in cellulose, we reach a high absorption without adding any unnecessary additives such as superabsorbents.

All edges are sealed ensuring the highest possible food safety.

Absorption water: 5000ml/m²
Absorption 0,9% saline solution: 2500ml/m²

PUTTING TRUST IN YOUR FOOD

Food safety has never been higher on the agenda. Grocery retailers, distributors and end-consumers demand being able to trust that liquids and chemicals are locked away and the fresh food will remain just that: Fresh, even in appearance. That's why, when packing your food, you are actually packing much more: a promise of unquestionable food safety, hygiene and value.

4-SIDE SEALED EDGES

Cellsorb Circular closed food pads are placed in VAC packaging and MAP trays. Superfluous liquids from the food pass through the bottom and top layer to be absorbed by the kernel. The liquids are sealed inside the kernel for a prolonged time.

Since the pad is closed, no fibers in the absorbent kernel are released to be in contact with the food, as can be the case with traditional open-edge food pads.

CIRCULAR SOLUTIONS

Circular contributes to plastic reduction in food packaging. The mono-material design is eco-friendly, highly absorbent and with the added benefits of prolonging the storage life. It is compliant with the EU packaging directive for 2030 as recyclable in the paper stream and applicable for industrial compostable (EN13432). It will also help reduce the usage of plastics in fresh food packaging industry.

CELLSORB CIRCULAR - PLASTIC REDUCTION

When you choose Cellsorb Circular pad, your company will be able to reduce the usage of plastic materials in the packages. The traditional pad has a high amount of plastic which cannot be recycled since it consists of a mix of materials, e.g the kernel as often is filled with SAP/SAF (Super absorbent powder/fibers). Choosing Cellsorb Circular pads puts an end to this issue and help your company to achieve expected future benchmarks for 2025.

Foodtech

Thanks to our own development and production, we can adjust our products depending on your needs and requests regarding absorption levels, shelf life and dimensions. Please contact us with your specific product needs.

Responsible Sustainability For The Future

Cellsorb CIRCULAR – Pure cellulose

The most innovative and sustainable choice for responsible food packaging.

Cellsorb CIRCULAR offers is a highly efficient, cellulose mono material absorber, giving an opportunity for significant plastic reduction and circular food packaging.

Cellsorb CIRCULAR is available for brand owners and producers to make a wise choice that reduces the environmental impact of the food packaging industry.

- Cellulose mono material
- Free from super absorbents
- 4 side sealed edges
- Suitable for all types of fresh groceries
- Highly absorbing core
- Recyclable
- Made in Sweden

Absorbing Food pads Cellsorb CIRCULAR

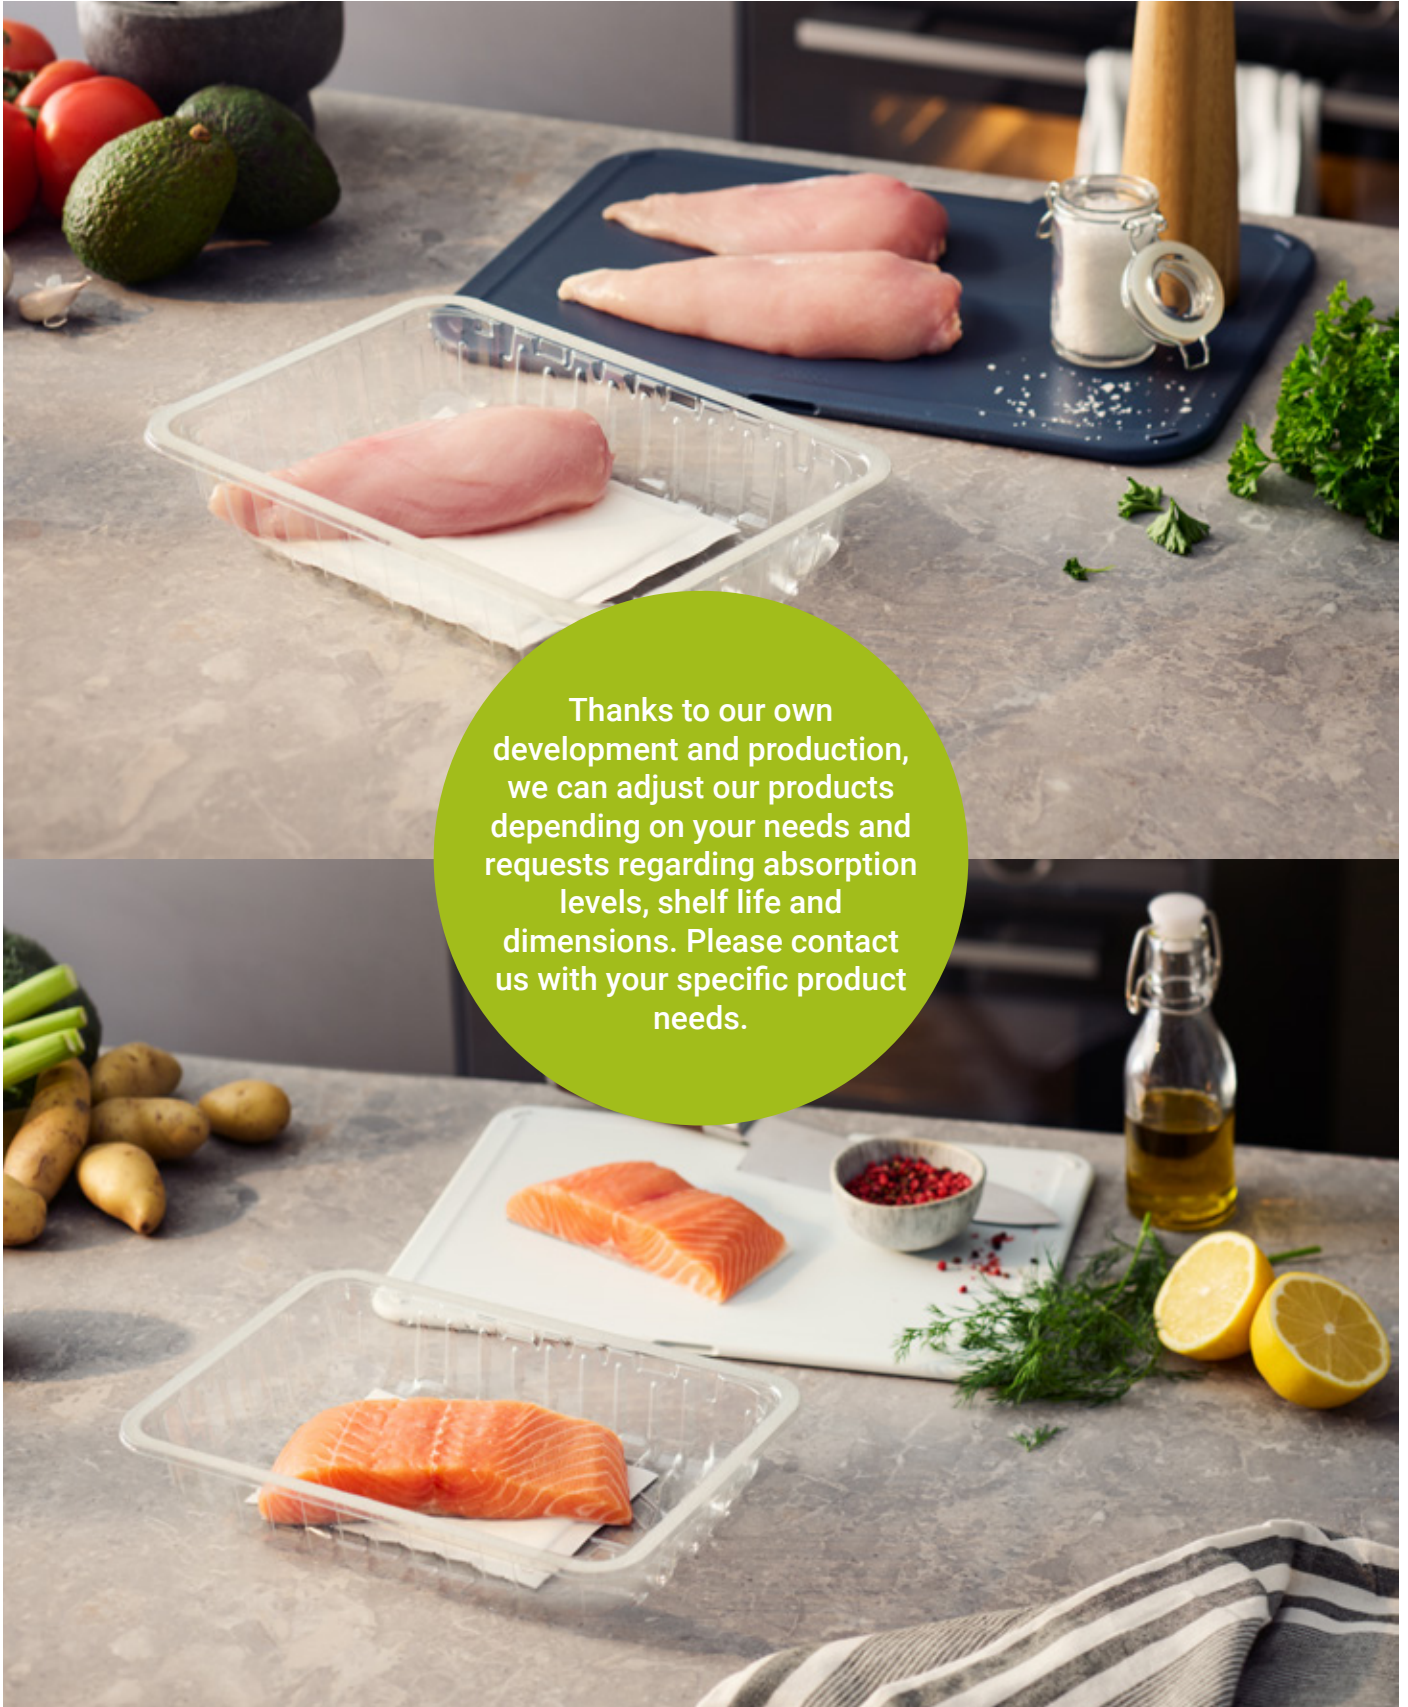

Cellsorb Circular food pads assortment consists of a wide range of different sizes and absorption capacities to fit different kind of foodstuff as well as different types of packaging.

Item no.	Name and description	Size (mm)	Absorption (ml)	Material

Hygiene, Safety,
Environment and Comfort

Hygiene

A young child with curly hair, wearing a white sleeveless shirt and a white diaper, is walking away from the camera on a wooden boardwalk. The boardwalk leads towards a body of water under a clear sky at sunset. The child is barefoot. The text "Solutions that contribute to the quality of life and wise choices." is overlaid in white on the lower part of the image.

Solutions that
contribute to the
quality of life and
wise choices.

Sustainable, comfortable and safe laminate for diapers and panty liners

SUSTAINABLE, COMFORTABLE AND SAFE LAMINATE FOR DIAPERS AND PANTY LINERS

Solutions intended for personal hygiene and enuresis care such as panty liners, sanitary napkins and diapers, have high demands in comfort and function with clean, organic materials.

At Cellcomb we take it one step further.

The climate, future generations and our health are important aspects of life. Therefore, we are specialized in sustainable solutions. Our laminate is manufactured in Sweden and in many cases produced out of renewable raw materials that are compostable.

Our combination of efficient manufacturing and high capacity of roll goods creates possibilities for customization depending on your needs. This makes us a clear partner in producing hygiene and enuresis products.

Cellcombs hygienic laminate consists of non-woven such as viscose or polypropylene, tissue, or air-laid in combination with a protective barrier of breathable starch-based biofilm or PE-film – the choice is yours. Either option, the result is that our laminate is soft, durable and protects against bacteria, microorganisms and fluids. At the same time, it is suitable for numerous areas of use such as on diaper back sheets and one-piece packages for panty liners.

FOCUS ON THE ENVIRONMENT AND CUSTOMIZATION

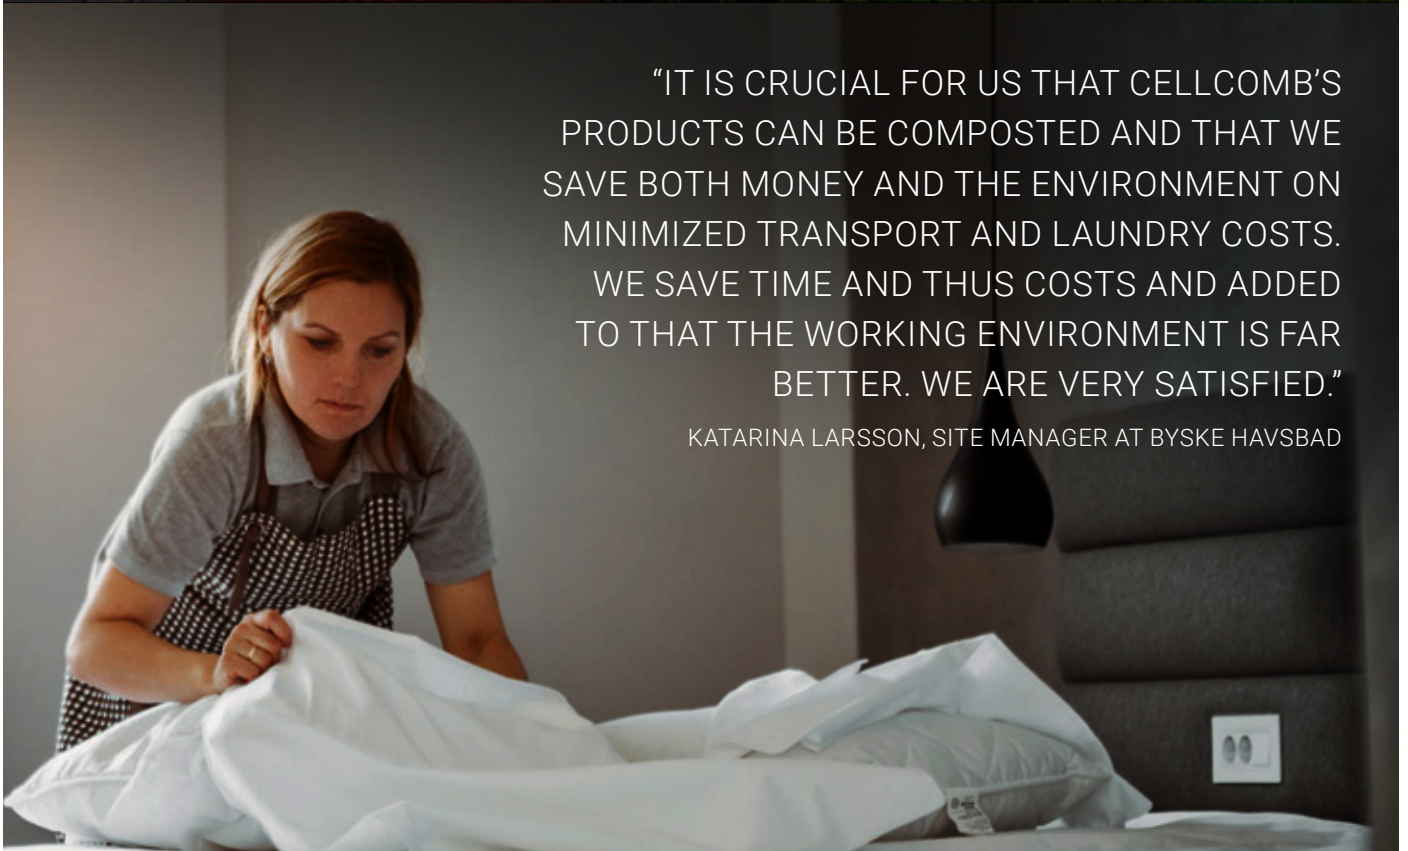

We offer sustainable laminate on roll goods which creates big opportunities. Based on our basic range, we are flexible to adjust to your specific wishes.

HomeAway

"FOR THE GUESTS IN OUR SELF-CATERING COTTAGES, THIS HAS BEEN ABSOLUTELY PERFECT. THE GUESTS HAVE BEEN VERY HAPPY AND SATISFIED AS THEY HAVE EXPERIENCED THAT THE QUALITY AND COMFORT OF THE BEDDING HAS BEEN VERY GOOD."

HOTEL MANAGER AGNETA NYSTRÖM, PITE HAVSBAD

"IT IS CRUCIAL FOR US THAT CELLCOMB'S PRODUCTS CAN BE COMPOSTED AND THAT WE SAVE BOTH MONEY AND THE ENVIRONMENT ON MINIMIZED TRANSPORT AND LAUNDRY COSTS. WE SAVE TIME AND THUS COSTS AND ADDED TO THAT THE WORKING ENVIRONMENT IS FAR BETTER. WE ARE VERY SATISFIED."

KATARINA LARSSON, SITE MANAGER AT BYSKE HAVSBAD

Offer your guests quality and comfort as well as a sustainable alternative to textiles

SUSTAINABLE, WITH A PROTECTIVE BARRIER MADE FROM RENEWABLE MATERIALS

Regardless of when, where and how, a good night's sleep in comfortable, soft materials is always desirable. Based on our experience, this can be a challenge for short-term accommodations with a lot of visitors as bed sets are changed frequently. In addition to this, washing and storage possibilities can also be more limited. Our solutions entail crisp, soft sheets and towels ensuring comfort as well as contributing to a better climate.

Cellcomb Homeaway consists of sustainable solutions for short-term use, convenient in many different areas of use. The range was developed as a sustainable alternative to textiles. They are the perfect option if you want to sleep comfortably, save time and the environment. At the same time, reducing the workload for employees in the hospitality industry is addressed as they only weigh 1/5th as much as conventional cotton alternatives, are compact, flexible and do not require any washing.

Our bed set assortment Travel Soft comes in two ranges – both just as comfortable, but with different recycling options.

Our Biolam® range is manufactured out of renewable raw materials which make them compostable. The other series is called Hygilam® and can be recycled for recovering energy.

All our bed sets can be equipped with a protective barrier made from renewable materials. This offers great protection against bacteria, microorganisms and liquids. Because of this, mattresses, quilts and pillows do not have to be changed as often.

In addition to sheets, pillowcases and towels, we continuously supplement with other products based on the same good possibilities and properties, such as shoe protection, aprons and garbage bags, to name a few

HomeAway

MULTIPLE AREAS OF USE

Cellcombs solutions entail sustainable choices that ensure high comfort and simplicity. Apart from this, they can fulfil specific needs for different business areas and various activities:

Mountain huts

- when storage, washing and transport opportunities are limited.

Long-distance flights

- for both passengers and crew's ability to rest. They are compact and light to store, easy to handle and facilitate logistics.

Sleeping carriages on trains

- when there is a great demand for smooth, fresh and convenient solutions.

Camping, hostels and holiday villages

- besides being able to offer guests a fresh and practical bedding solution, they also decrease the amount of heavy lifting, time and water consumption by being neat, light and comfortable.

Spa facilities

- protection for treatment tables, beds and pillows for various treatments..

Jails and custodies

- making management and logistics easier.

RV's/Motor homes and boating

- by choosing recyclable products when packing, you avoid unnecessary dirty laundry whenever there are limited water supplies or storage space.

Tournaments, camping sites and festivals

- when simple overnight stays occur, whether it's only for the night or a whole week, Cellcombs Homeaway range contributes to a good night's sleep. At the same time, you are making a sustainable choice!

Activity Clubs

- creates an opportunity to earn money on selling our packages including environmentally friendly sheets, duvet covers and pillowcases to friends and neighbours.

Camps and evacuation accommodations

- for every situation when a crisis occurs and washing and basic hygiene is a challenge.
